EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Faris on 09-21-2001.

The application has been amended as follows:

Claim 24 has been changed as follows:

A method of distributing broadcast signals received from an artificial satellite comprising:

receiving a first polarized block of signals and a second polarized block of signals from the artificial satellite;

frequency converting at least one of said first block of signals and said second block of signals to different frequencies;

after processing by the frequency converting step, applying said first or second block of signals with said converted block of signals to a coaxial cable such that the same coaxial cable carries both said blocks of signals simultaneously;

recovering both said blocks of signals from the coaxial cable; and further frequency converting said converted block of signals to a frequency range a satellite receiver can receive; and

Application/Control Number: 09/621,464

Art Unit: 2682

selecting between said first block of signals and said second block of signals for application to the satellite receiver.

Claim 32 has been canceled.

2. The following is an examiner's statement of reasons for allowance: regarding independent claims 22 and 24, the applied reference Uemura does teach converting polarized block of signals at converters 3 and 4 in figure 1. However, Uemura does not transmit all converted block of signals via a single cable 13 as recited in the claims (Uemura instead transmits only *selected* signals which are selected by processors 7a-7d to a single cable 13). For that reason, a converter 43 in figure 4 of Uemura does not convert block of signals as claimed (the converter 43 only converts selected signals which are selected by processors 7a-7d).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nguyen T Vo whose telephone number is (703) 308-6728. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivian Chang can be reached on (703)308-6739. The fax phone numbers
